Indore, India | Open to Relocation | + 91 8959963566 | [vaidikakaul20@gmail.com](mailto:vaidikakaul20@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## SUMMARY

Full Stack Developer experienced in designing and shipping AI-enabled SaaS platforms, leveraging robust system design, ML/RAG pipelines, and cloud-native deployment to automate processes and solve real-world business problems.

## EXPERIENCE

### Research Intern - Medcaps University | Jun - Jul 2025 | [GitHub](#)

- Developed a CNN-based satellite image steganography detection system achieving 95.6% cross-domain accuracy while enabling secure 256-bit payload embedding and evaluating robustness through domain-generalized benchmarking.

### AI/ML Intern - Edunet Foundation | Apr - May 2025 | [GitHub](#)

- Built and trained a CNN-based forest fire detection model using image augmentation, binary classification, and performance evaluation pipelines to enable automated wildfire identification from aerial imagery.

## PROJECT EXPERIENCE

### MAKNE - SaaS Platform for Brand-Creator Collaboration - [Live](#) | [GitHub](#)

[ Tech Stack: *Next.js, TypeScript, Node.js, MongoDB, JWT, REST APIs, OpenRouter, Vercel* ]

- Architected and shipped a production-grade SaaS platform supporting 3 user roles and a milestone-driven agreement lifecycle, integrating AI-powered agreement creation, deliverable analysis, revision assistance, and creator automation.
- Built 40+ JWT-secured RESTful APIs with role-based access control and structured data models, enabling end-to-end agreement execution, milestone tracking, revision cycles, and cross-platform collaboration between brands and creators.

### Karrio - AI-Assisted Job Application Management Platform - [Live](#) | [GitHub](#)

[ Tech Stack: *Next.js, React, NestJS, TypeScript, PostgreSQL, Prisma ORM, JWT, Docker, Chrome Extension APIs* ]

- Architected and shipped a job application management platform integrating LinkedIn job capture, application tracking, interview scheduling, reminder automation, and AI-assisted career workflows through a unified user experience.
- Engineered JWT-secured REST APIs with NestJS, Prisma ORM, and PostgreSQL, enabling duplicate detection, activity tracking, automated reminders, and end-to-end application lifecycle management across web and extension clients.

### Anomate Stream - ML-Driven Anomaly Detection for Containerized Systems - [GitHub](#)

[ Tech Stack: *Python, Isolation Forest, Falco, scikit-learn, Pandas, Streamlit* ]

- Designed a 5-stage modular anomaly detection pipeline for container runtime security using Falco-mimic system call logs, spanning data ingestion, preprocessing, ML inference, visualization, and deployment in a unified workflow.
- Trained an Isolation Forest model on encoded runtime features, achieving 94.6% accuracy, 91.2% precision, and 90.3% F1-score while enabling real-time anomaly detection and analysis through a Streamlit-based dashboard.

## EDUCATION

- B.Tech, Computer Science Engineering**, Medi-Caps University, Indore 2022-2026 | **CGPA: 8.14**
- CBSE XII**, SICA S.S. School, Indore 2021-2022 | **87.6%**

## SKILLS

**Frontend:** Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, Responsive UI Design, UI Components

**Backend & Databases:** Node.js, Express.js, NestJS, REST APIs, JWT Auth, RBAC, MongoDB, PostgreSQL, Prisma ORM, Redis

**AI/ML & Tools:** ML, Isolation Forest, LLM Integration, OpenRouter, RAG, LangChain, Docker, Git, GitHub Actions, Postman

## TRAINING & PROGRAMS

### HCL Tech Generative AI Program | Jan 2026 – Jun 2026 | [GitHub](#)

- Built a RAG-based banking advisory assistant using LangChain, ChromaDB, and Gemini, enabling semantic retrieval, context-aware question answering, and source-grounded responses from banking documents through a web interface.

## ACHIEVEMENTS

- Hack'Ndore (National Hackathon)** | Top 100 teams nationwide for developing and presenting a functional prototype.
- Re-Imagine (National Frontend Hackathon)** | Top 800 teams nationwide for frontend and UI development. | [Project](#)
